Key Locking Standard

Unless otherwise requested the cabinets are supplied with key locking as standard. The lock type will vary depending upon its position in our Gold, Silver or Bronze grading. Securikey recognise that there may be a requirement to add or alter the standard locking option, it is for this reason we offer the follow alternatives

Factory set combination -

A combination lock with 4 preset combinations. Bronze range only.

Electronic safe lock with Audit trail -

Full function lock with multiple users, audit trail and time locking to prevent unauthorised entry during specific time zones. Available on all grades.

Basic electronic locking -

Our entry level digital keypad lock. Bronze range only.

Dial combination lock -

A combination lock used extensively in the safe industry. Offers in excess of 1 million combinations. Available on all grades.

Electronic safe lock -

A heavy duty style lock with versions available from La Gard and Mas Hamilton depending upon personal preference. All with multiple user codes. Available on all grades.

SYSTEM CABINETS

The Securikey System Cabinets are graded in our Bronze category. This range are manufactured to meet the needs of both domestic and light commercial applications. They provide the facility to control and track keys from 20 to 2080 in number and are used extensively throughout businesses worldwide. The cabinet is secured with a very high quality Securikey cam lock as standard and forms the entry level for our large range of key control systems.
