

Key Control

This range of cabinets are manufactured and tested to the highest standards. Each cabinet has been appointed a strength and security test from gold through to bronze. Their high quality manufacture and multiple locking options make them ideal from domestic to high security commercial applications.

A range of Cabinets to control and track keys

Bronze System 20

Key Sign Out Tab

Key Locking Standard

Unless otherwise requested the cabinets are supplied with key locking as standard. The lock type will vary depending upon its position in our Gold, Silver or Bronze grading. Securikey recognise that there may be a requirement to add or alter the standard locking option, it is for this reason we offer the follow alternatives

Factory set combination -

A combination lock with 4 preset combinations. Bronze range only.

Electronic safe lock with Audit trail -

Full function lock with multiple users, audit trail and time locking to prevent unauthorised entry during specific time zones. Available on all grades.

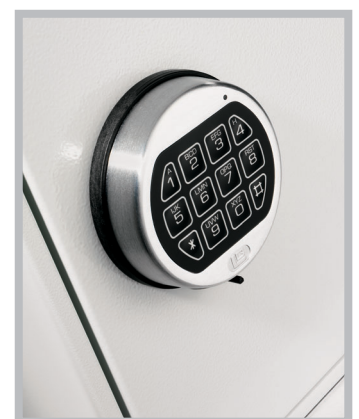

Basic electronic locking -

Our entry level digital keypad lock. Bronze range only.

Dial combination lock -

A combination lock used extensively in the safe industry. Offers in excess of 1 million combinations. Available on all grades.

Electronic safe lock -

A heavy duty style lock with versions available from La Gard and Mas Hamilton depending upon personal preference. All with multiple user codes. Available on all grades.

KEY VAULT

A new range of cabinets to control, track and secure keys. This new product has been specifically designed to meet a growing need for increased security in the key control market. The Key Vault provides the tried and tested method of control and tracking of keys available in our bronze system cabinets but with far greater security. The body is constructed from 2.5mm steel (max) with a 3mm door. They offer double security and triple the strength of the bronze range, the key vault is best suited to commercial usage where the loss or misuse of a key can seriously damage the owners business.

Locking is provided by a European half cylinder as standard. This can be replaced upon delivery of the cabinet with one that integrates with your existing in-house system.

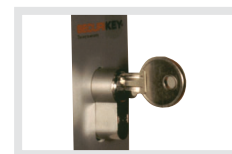

The door is interchangeable to allow upgrade of locking.

Key control from 30 to 600 keys with deeper options for larger bunches or car remotes.

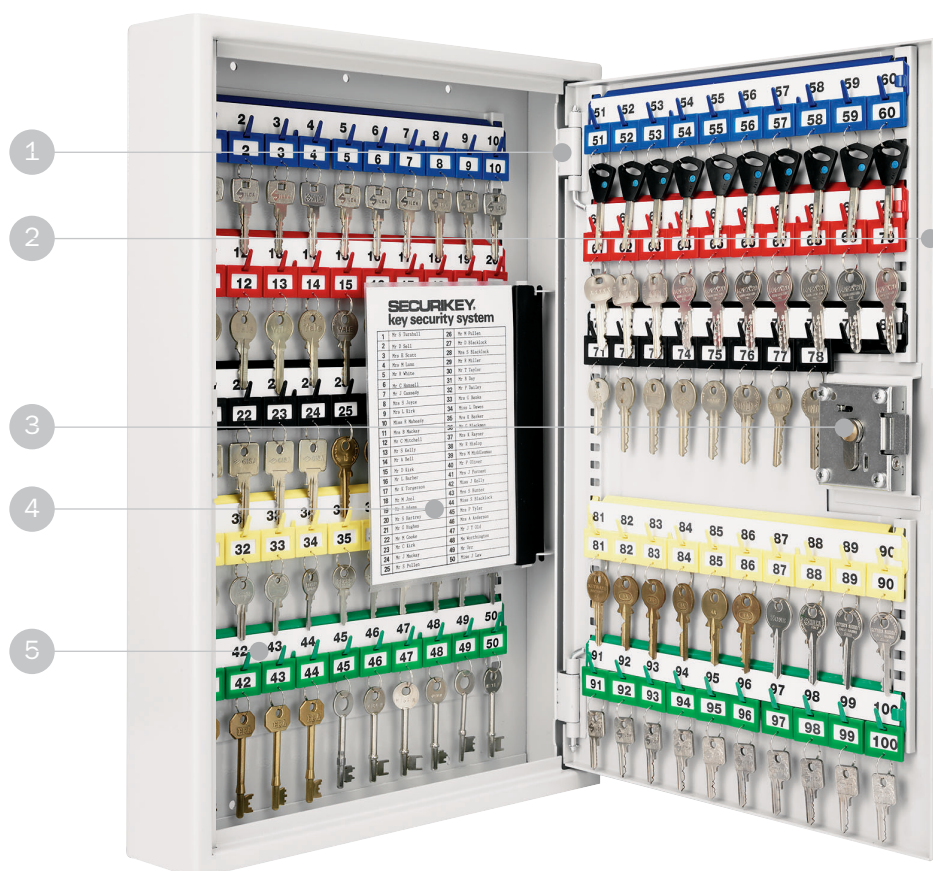

Best suited to provide both key control and security.

2.5mm Fabricated Steel Body

Euro Half Cylinder Locking

KEY:

1: REMOVABLE HINGE PIN ALLOWS DOOR TO BE REPLACED

2: 3MM DOOR THICKNESS

3: EURO PROFILE LOCK CASE

4: REMOVABLE CONTROL INDEX

5: ADJUSTABLE HOOK BAR

Key Vault - providing protection well above the bronze Key Cabinet range. Designed to meet the requirements of insurance companies in preventing loss of keys associated with risk to valuables or property. As standard the Key Vaults are supplied with a half euro profile cylinder that can be easily replaced to integrate with an existing master key or security system. 2.5mm body and 3mm door (max).
